Watch Out

By: Seyon S, Sarah W, Harini A, Sakthi K and Derek Y

Our Goal:

Our goal is to make sure kids aren't bored during quarantine. Being isolated means that you can't meet your friends and are stuck at home talking to your family, which gets pretty boring at one point, not that they're annoying or anything. It's just fun communicating with different people. So we hope that through "Watch Out", we could make people less bored.

What is our game about?

We decided to create a "virtual laser tag" game. It's a multiplayer game which takes the idea of laser tag and makes it virtual, since we can't go out anymore. There are 2 teams that try to hit each other with virtual lasers to earn points for their team. The team with the most points wins. You can unlock cooler skins, play on different maps and gain more points and higher scores to get further up the leaderboard! The more points/people you hit with your laser, the higher up you'll go. Reaching the leaderboards also has special perks, such as unlocking cooler and more rare skins, boosts in the game, etc. That's pretty much the main idea of what we're doing.

Options For The Positioning Board:

These are the options for the positioning boards. The first one shows the the names and their scores in one row from highest (score) to least (score). The second option shows your place number and how many points you needed to surpass the player in front of you.

Option #1

1.	tjaos339	score: 98500
2.	Pthfndr123	score: 97034
3.	wierdo476	score: 72309
4.	ajkm04	score: 72289
5.	deadmeat (you)	score: 70049
6.	:) smlz	score: 43808
7.	Bst23	score: 43709

Option #2

5th place
2240 points behind ajkm04

Our Responses:

We sent out 2 surveys to our class to fill out. One was for our logo, another was for the "positioning board" for our game. The results we got are on the right.

We got 23 responses for our logo form and 14 responses for the position board.

Which logo looks better?
23 responses

- Logo 1
- Logo 2
- Logo 3
- Logo 4

34.8%

Selected Board

We ended up taking some suggestions and combining the 2 boards together, to create a more useful system. Since all the people who filled out the form chose option A, that was what our team decided to go with.

Selected Logo

We ended up going with this logo, as it was the one that was selected by most people. Out of 23 people, 8 chose this logo, (logo 4), 7 chose logo 3, 6 people chose logo 1 and 2 people chose logo 2. Now that we've selected a logo, we can add it to all our prototypes, game screens, etc.

Conclusion

In conclusion, our data has concluded that Logo 4 is the most effective of the 4 logo prototypes and that Positioning Board 1 is the most effective of the 2 positioning board prototypes. We surveyed 4 logos and 2 positioning boards that we thought were amazing.

Moving forward our group will use Logo 4 and Positioning Board 1 as they were preferred over the rest.

Thank you to the people that filled in our surveys. It is greatly appreciated.

Any questions?
